A FRIEND WAS CUTTING DOWN A
HONEYBEE TREE AND I BOUGHT THE
LOGS THINKING I COULD CUT THEM
INTO SLABS AND MAKE IT OUT OR
SOME THING. I GOT THEM IN A
DRY PLACE FOR A YEAR AND THEN
SANG A QUAD OF PINE WITH A BIG
OLD BAND SAW. I COULD ONLY DO
ABOUT 100 FEET AT A TIME
BUT FINALLY SANG OFF A
SINGLE LOW THICK SLAB. I DECIDED
TO MAKE THIS CHIPPED STONE
SINGLE TREE TRIMMING FROM THE
YEAR FOR THE LOGS. THAT'S ALL
IT'S MADE SO FAR.
